

JASON RICHMOND

Hello team. I'm Jason and based in Nottinghamshire. I've been leading trips for World Challenge since around 2006 and have led close to 40 trips to destinations all over the world. I believe that travel is an important part of a young person's development and I love being able to facilitate that through my work. My core values focus on building confidence within the entire team, enabling everyone to develop skills for life through unforgettable experiences.

MY FAVOURITE TRAVEL STORY

There are so many, but it's the people I share the journey with that I remember the most. It's difficult to choose just one, but the achievements of young people when faced with challenges continue to amaze me. Equally, sharing the cultural experiences of far-flung places with others as they absorb the vivid colours, smells and food combine to make the best memories.

MY TOP TRAVEL TIP

Throw your self into the experience with your team and give everything you have. It will be over before you know it and will no doubt form some of your best memories. Make sure you also pack your sense of humour and patience.
